RESUMÉ

Dagbogen er en natur og fugle beskrivelse af rejsen med sejskibet "Rylen".

Rejsens formål er indsamling af materiale til Achton Friis, "De Danskes Øer", der på 1.200 sider i 3 bind beskriver livet, naturen, historien og kulturen på de danske øer i 1920'erne. Denne sidste del af dagbogen indeholder tegninger fra togtet, og en opsummering af de observerede fugle.

A pencil sketch of a tree on a grid background. The tree has a thick, textured trunk and several thin, spindly branches. To the right of the trunk, there are several sets of vertical hatching lines of varying lengths, suggesting foliage or a background texture.
